**MANUFACTURING | SUPPLY | DISTRIBUTION**

Quality FIBC, Bulk Bags/Big Bags, Supersacks, 1 Ton Totes for the following industry sectors:

Agriculture | Food | Export Commodities | Pharmaceuticals | Chemical

Mining | Sand/Aggregates | Fertilizer | Construction | Recycling

# Our Story

At **The Bulk Bag Company**, our role has squarely been to support America's Industry and most certainly the food supply chain with our products.

As time moved on, and with additional manufacturing resource capabilities, we found ourselves reaching across the global food supply chain.

## Manufacturing

# Resilience & Strength

Like many others, we were confronted with unprecedented supply chain challenges and uncertainties.

But, with a sound organizational base and a prudent financial position, **The Bulk Bag Company** overcame the storms within the international trading arena. This helped avoid manufacturing shutdowns, shipping delays and raw material stock availability and volatility.

**The Bulk Bag Company's** resilience, strength, and endurance are the product of a dedicated and well-coordinated international staff, that drives our “can do” attitude.

# Growth & Expansion

After moving into a leading support roll for the California Food, Agricultural and Nutraceutical Industry sector, **The Bulk Bag Company**, expanded its presence and reach into corresponding businesses and processing operations throughout the US and Canada.

# International Sales & Distribution

Most recently, **The Bulk Bag Company** has developed a Sales and Marketing strategy that will see **The Bulk Bag Company** brand in Europe, South America, and other parts of the world.

# Sustainability

With increased productivity comes increased responsibility.

This irrigation pipe is made from recycled pulverized Bulk Bag/Big Bag material that would have otherwise be sent to a landfill.

◀ RECYCLED RESIN MADE FROM BAGS

As responsible global citizens, we are creating a sustainable future for generations to come.

**Join our sustainability program.**

# VACQPACK | Bulk Vacuuming System

## LOW OXYGEN LEVEL PACKAGING

### LONG TERM PRODUCT PROTECTION

Effectively proofing product against moisture producing mold aflatoxins, oxidation, rancidity, and insect infestation.

### A PATENTED SYSTEM

The VACQPACK Modified Atmospheric Pressure (MAP) system negates the need for blanket fumigation with toxic gases for insect infestation.

### THE ORGANIC SOLUTION

VACQPACK, with its modified atmospheric pressure system, is the BEST solution for TRUE organic fumigation of organic products and commodities, at all levels of the organic supply chain.

### HIGHEST STANDARDS OF PRESERVATION

VACQPACK helps maintain product integrity from start to finish in the supply chain journey.

**Call today for details on how VACQPACK can be applied to your project.**
